COMMIT REPORT

Dive into the commit's metadata including author, timestamp, description, and associated scan results.

What does this report contain?

This report provides a high-level summary of the selected commit, including repository details, commit metadata, total security findings, and a comparison of issues introduced or resolved since the previous commit. It serves as a quick overview of the commit's impact on code quality and security posture.

Commit Metadata

Commit Description

Merge pull request #6767 from divamidesignlabs/revert-6766-revert-6764-stag...

Commit ID e1942127

Committed by web-flow

Committed 1 day ago

Scanned by Agent 6.17.0

Scan Duration --

Report Fetched on 05:38 PM [IST]
24-06-2026

Total Findings

- SCA 7
- Secrets 0
- SAST 44

Total 51 issues (SCA, Secrets, SAST) were found during this PR scan.

Issue Status Since Last Commit

36 resolved issues

You have resolved 36 unique issues in this commit compared to your previous commit

51 new issues

You have created 51 new unique issues in this commit compared to your previous commit

FINDINGS OVERVIEW.

Visual summary of severity-based issues from SCA, Secrets, and SAST scans, along with SBOM insights highlighting vulnerabilities in third-party packages

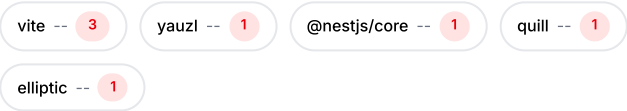

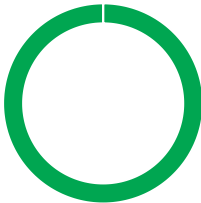

SBOM

Total packages 3400

Vulnerable packages 5

0% of your packages contains vulnerabilities

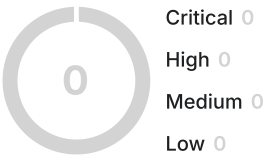

Note You can view all the Packages in your Dashboard

SCA

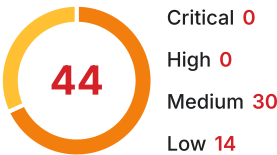

Total 7 issues were found during this PR scan.

Secrets

Total 0 issues were found during this PR scan.

SAST

Total 44 issues were found during this PR scan.

FINDINGS LIST.

View list of severity-based issues from SCA, Secrets, and SAST scans, along with SBOM insights highlighting vulnerabilities in third-party packages
